ENVIRONMENTAL POLICY

- It is the policy of Alutrade Limited to manage and utilise resources to minimise any permanent impact on the environment.

- This will be achieved by: -
- Operating our process in accordance with or better than, legislative and regulatory requirements and implementing procedures, which comply with ISO 14001.
- Monitoring and controlling environmental performance to ensure that all processes are operated to minimise their adverse environmental impacts.
- Setting and reviewing environmental objectives and targets toward continuous improvement.
- Manufacturing, and packaging our products in ways, which minimise the energy and other resources, utilised and the amount of waste produced.
- Assessing in advance the environmental impacts of any new product or process and ensuring that new plant is designed using the best available technology where appropriate and economically viable.
- Considering the effect of our operations on the local community and taking account of their views.
- Raising awareness of our workforce to the importance of environmental issues and them and other interested parties with clear, up-to-date information on the company's environmental performance.
- Commit to demonstrate ongoing continual improvements with regard to environmental performance.

M. George Managing Director 19th February 2025
